INDEX OF ABSTRACTS

VOLUME 6

(Number refers to page on which abstract begins.)

Abian, Smbat and Brown, A. B. On the solution of an implicit first order partial differential equation, 278; A theorem on partially ordered sets, with application to fixed point theorems, 507.

Abraham, Ralph. Jump conditions in Lichnerowicz space-time, 618.

Accola, R. D. M. The bilinear relation on open Riemann surfaces, 183; Differentials and extremal length on Riemann surfaces. Preliminary report, 552.

Aissen, M. I. A simultaneous solution of an algebraic equation. Preliminary report, 842.

Alling, N. L. On extending valuations of an o-group to its Dedekind completion, 644; On the existence of real-closed eta-sub-alpha-fields of power aleph-sub-alpha. Preliminary report, 823.

Altman, M. The Runge-Kutta method in Banach spaces, 266; The critical value of a linear operator and a method of finding the minimum eigenvalue, 507; The best successive approximation, 508; Inversion of linear bounded operators and matrices, 508.

Amir-Moéz, A. R. and Davis, Chandler. Generalized Frobenius inner products, 411.

Amitsur, S. A. Derived functors without projective and injective resolutions, 801.

Anderson, L. W. On the existence of continuous lattice homomorphisms. Preliminary report, 164.

Anderson, L. W. and Ward, L. E., Jr. A structure theorem for topological lattices, 636; One-dimensional topological semi-lattices, 637.

Anderson, R. D. Plane sections of topological spheres, 635; The groups of all homeomorphisms of the solenoids, 863.

Anselone, P. M. Convergence of Chandrasekhar's method for the problem of diffuse reflection, 429.

Antosiewicz, H. A. On certain systems of linear ordinary differential equations, 273.

Appel, K. I. Partition rings of finite abelian groups. Preliminary report, 184.

Armentrout, Steve. A Moore space on which every real-valued continuous function is constant, 410.

Aronson, D. G. Uniqueness of solutions of the initial value problem for parabolic systems of equations, 40; On the initial value problem for parabolic systems of differential equations. II, 839.

Aronszajn, Nachman and Donoghue, W. F., Jr. The exponential representation of functions analytic in the upper half-plane with positive imaginary part, 861.

Aronszajn, Nachman and Fixman, Uri. Algebraic spectral theory for couples of linear transformations. Preliminary report, 429.

Aronszajn, Nachman, Krzywicki, A. and Szarski, J. A unique continuation theorem for exterior differential forms, 429.

Arsove, M. G. and Edwards, R. E. Generalized bases in topological linear spaces, 167.

Artzy, Rafael. Relations between loop identities, 138.

Askey, Richard and Hirschman, I. I., Jr. Mean summability of ultraspherical polynomials, 777.

Asplund, Edgar. Comparison between plane symmetric convex bodies and parallelograms, 550.

Aubert, K. E. Convex ideals in ordered group algebras and the uniqueness of the Haar measure, 184.

Aumann, R. J. Generalized link products, 767.

Auslander, Joseph. On the proximal relation in topological dynamics, 799.

Auslander, Louis. Fundamental groups of compact solvmanifolds, 155; Discrete uniform subgroups of a class of Lie groups, 809.

Auslander, Louis and Youngs, J. W. T. Imbeddings of graphs, 808.
